

Vetri Suriya R

Senior PHP & WordPress Developer | AWS & Linux | Cloud Deployment

Mobile No.: +91 8098898019

Email: vetrisuriyar@gmail.com

Experience

- *Freelance PHP, WordPress & Cloud Consultant*

(Mar 2025 – Present)

- Developed custom PHP and WordPress applications for freelance clients.
- Deployed and maintained PHP and WordPress applications on AWS EC2 instances running Linux.
- Designed and integrated REST APIs with third-party services.
- Improved application performance, fixed bugs, resolved production issues, and implemented common web security practices.
- Managed production deployments, application maintenance, and feature enhancements.

- *Senior WordPress Developer | Cloud & DevOps Engineer*

BlockWoods Marketing Management (Jan 2024 – Feb 2025)

- Designed and developed custom WordPress websites with responsive design, performance optimization, and SEO best practices.
- Built and customized WordPress themes, plugins, Elementor widgets, Custom Post Types (CPT), and Advanced Custom Fields (ACF).
- Developed headless WordPress solutions using the WordPress REST API and integrated frontend applications where required.
- Integrated third-party REST APIs with WordPress applications.
- Deployed and maintained applications on AWS EC2 with Linux server administration.
- Configured DNS and CDN services using Route 53 and CloudFront where required.
- Worked with Git for version control and participated in deployment processes.
- Used Docker for local development and application deployment where applicable.
- Optimized website performance, fixed production issues, and improved user experience.
- Managed the complete development lifecycle, including development, deployment, maintenance, and production support.

- *Freelance PHP Developer & WordPress Consultant*

(Mar 2023 – Dec 2023)

- Developed custom business websites and CMS solutions using PHP and WordPress.
- Integrated third-party REST APIs, payment gateways, and external services.
- Performed website migrations, optimized application performance, resolved production issues, and implemented common web security improvements.
- Deployed and maintained applications on Linux-based hosting environments and provided production support.

● *PHP Developer / Backend Engineer / DevOps & Cloud Exposure*

Shrav Infotech (Feb 2022 – Feb 2023)

- Developed and maintained backend applications using Core PHP following coding standards and best practices.
- Built MVC-based web applications using CodeIgniter with modular and maintainable architecture.
- Designed and optimized MySQL databases through query optimization and efficient database design.
- Upgraded and maintained PHP applications, including version compatibility improvements where required.
- Implemented common web security practices such as input validation, prepared statements, and secure session handling.
- Deployed and maintained applications on Linux servers and supported application deployments.
- Used Git for version control and participated in deployment activities.
- Developed and maintained WordPress websites, customized themes and plugins, integrated REST APIs, and optimized website performance for multiple client projects.

● *Freelance PHP & WordPress Developer*

(Oct 2021 – Jan 2022)

- Developed custom WordPress websites and business solutions for small business clients.
- Built custom themes, plugins, and backend functionalities using PHP and WordPress APIs.
- Deployed and maintained WordPress applications on Linux-based hosting environments and provided ongoing application maintenance.

● *Software Developer*

S10 Healthcare Solutions Private Limited (Aug 2018 – Sep 2021)

- Developed internal CMS web applications to streamline workflows across multiple organizations on a unified platform.
- Built responsive, cross-browser user interfaces using HTML5, CSS3, Bootstrap, and JavaScript following web standards.
- Developed custom Chrome Extensions to improve internal productivity and workflow efficiency.
- Integrated REST APIs and backend services to build dynamic web applications.
- Developed interactive dashboards and data visualizations using D3.js, Chart.js, and jQuery.
- Debugged and resolved front-end and backend issues to improve application performance and stability.
- Used Git for version control and team collaboration.
- Developed and maintained custom WordPress websites, themes, and plugins for healthcare and enterprise clients.
- Collaborated in an Agile development environment across multiple projects.

● *Web Developer*

Redback IT Solutions Private Limited (Oct 2017 – June 2018)

- Designed and developed internal CRM and HRM applications to automate business workflows.
- Developed marketing emails, landing pages, and WordPress websites based on business and branding requirements.
- Implemented on-page SEO best practices, including metadata optimization, semantic HTML, and website performance improvements.
- Developed responsive, cross-browser web applications using HTML5, CSS3, Bootstrap, and JavaScript.
